Service

Imperial Service

Service is so important that it helped us choose our company name. At Imperial, we give every customer the royal treatment. It's more than just a slogan. Our goal is to create an environment where radiology technicians and others are confident in their work and proud of the equipment they are using.

Brands We Sell and Serve

Part of our service is choosing to work only with high quality products. Experience has taught us which brands are most trusted by organizations who rely on X-ray, radiology and imaging products. Those are the proven brands we sell and service.

Service That Incorporates Your Business Planning

Imperial partners with organizations to make smart choices in imaging equipment. Every plan is more than just a purchase because we customize each solution to meet their needs and goals in the most efficient and economical manner.

We'll discuss not only your radiology and imaging needs, but look into how you forecast business growth, investment and expenditure. We recommend products based upon:

Future Scalability

Serviceability

Current and Future Exam Types

Pricing

True Specifications

Service – Meeting Compliance

Imperial makes it a priority to understand the laws and regulations of the states we serve. This helps our customers meet compliance.

Service That Incorporates Your Business Planning

Strong relationships with vendor partners ranging from physics to finance to help guide the process successfully regardless of the size or scope of the project.

Our Engineers are factory-trained on the equipment we sell and meticulous about quality of installation from proper alignment and functionality to wire management.

Service – Installation

Imperial doesn't cut corners. We ask ourselves how would we feel about entering our own installation for an exam? Imperial installations are neat, efficient and attractive – no unconcealed wiring or tangled wiring, or dirty equipment.

Imperial customers are proud of their equipment and the rooms where they work and serve patients.
