About TechnoAide

Techno-Aide is an ISO certified, Class 1 FDA medical device manufacturer that has been serving the medical community from Nashville, TN since 1977. Our mission is to efficiently and creatively solve problems to enhance the lives of our customers and employees. Through versatile medical device manufacturing, medical contracting, and metal fabrication services, we provide the highest quality products, foster a culture of innovation, and seek to positively impact the industries we serve. Techno-Aide is built on a culture of Ownership, Problem Solving, Communication, Consistency, and Work Ethic, embodying those characteristics in every aspect of our business.

We're a true One-Stop-Shop manufacturer that specializes in wearable radiation protection such as aprons, vests, skirts, and thyroid shields, as well as non-wearable radiation protection like mobile barriers and shields. We also manufacture a wide selection of positioning devices for patient comfort and image quality and offer a variety of foam positioners for patients and DR panel holders for imaging personnel efficiency. Techno-Aide aims to be the most trusted, honest, and transparent manufacturer within each industry we serve. To learn more about Techno-Aide, visit Techno-Aide.com or call 1-800-251-2629.

Bilayer Solves the K-Edge Effect

Traditional lead-free and material containing low atomic weight metals, whether used alone or in a mixed metal composite, face significant challenges. They simply cannot match the performance of bilayer materials due to the K-Edge Effect and resulting “*harmful fluorescence*” at critical kV levels. Testing has shown that these materials can only meet previous standards when evaluated between 80kV and 100kV using narrow beam geometry. The consequence?

Increased levels of absorbed dose received by the skin and organs, which can have serious, lasting, and career-limiting impacts on medical professionals. ***Techno-Aide’s Bilayer technology solves the K-Edge Effect by effectively eliminating harmful fluorescent radiation.***

Techno-Aide's **EZ Fit Sizing Tool** quickly and accurately fits people into the perfect Techno-Aide apron size without the need for measuring tapes. However, use these measuring charts to verify your fit if a measuring tape is the only available option.

Techno-Aide standard aprons (front, full wrap, vests, & skirts) are fit using two measurements:

- **Width** measured at the **widest point of the body** applicable to apron style
- **Length** measured applicable to apron style

Visit Techno-Aide.com/ez-fit-sizing-tool for step-by-step measuring instructions and to order your sizing tool today!

OUTLAST® COOLING FABRIC

Techno-Aide is proud to offer Outlast® Temperature Regulation fabric as an add on for apparel products. The material constantly works to cool the body when in motion by storing the heat in wax filled microcapsules that are woven into material's fibers and then releasing the heat back into the body when motionless. This material will keep the body cool during busy days and long hours of wearing radiation protection garmets.

COOL DOWN

Outlast's® body cooling technology starts with the natural wax from rapeseed oil enclosed in microcapsules that are easily applied to textile or fabric making Outlast® entirely renewable and sustainable. The wax melts within the microcapsules when the human body produces heat and stores the heat allowing the body to stay cool. When the body is no longer producing heat, smart fabrics solidify the wax releasing the stored heat back into the body. The constant active temperature adjustment provides consistent comfort to the user.

A BRIEF GUIDE TO POSITIONING SPONGES

Non-Coated

\$

pg. 33

Actual Image Under
Low Exposure X-Ray

- Basic (core) piece of porous (open cell) foam, no cover
- No cleanable surface
- Not resistant to fluids
- Not considered durable
- Highly radiolucent
- Artifact free
- Most inexpensive option on average
- Some shapes available in “Stealth” design to reduce the chance of artifacts

Closed Cell

\$\$

pg. 36

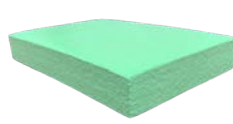

Actual Image Under
Low Exposure X-Ray

- High density, crosslink (closed cell) foam
- **Cleanable surface; No coating/cover required!**
- Entirely resistant to fluids/liquids
- High durability
- Highly radiolucent
- **Artifact free**
- **Most Cost-Effective option**
- “Stealth” design not necessary

Coated

\$\$\$

pg. 39

Actual Image Under
Low Exposure X-Ray

- Open cell foam covered with proprietary medical-grade coating
- Cleanable surface
- Resistant to fluids
- More durable than basic (core) foam
- Semi radiolucent
- Can be artifact free
- Second most expensive option on average
- Some shapes available in “Stealth” design to reduce the chance of artifacts

Vinyl Covered

\$\$\$\$

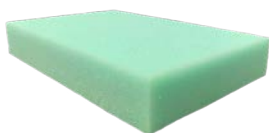

pg. 45

Actual Image Under
Low Exposure X-Ray

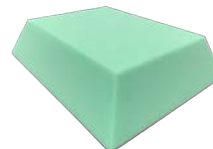

- Open cell foam covered with completely sewn vinyl cover
- Cleanable surface
- Resistant to fluids
- Extreme durability and comfort
- Semi radiolucent
- Not artifact free (sewn seams will show during most imaging)
- Most expensive option on average
- Not available in “Stealth” design

NON-STEALTH SPONGES

- Typically feature right angles; most common style for positioning sponges
- Right angles show as artifacts during imaging when a form of coating or covering is applied to core sponge

STEALTH/“FLARED” SPONGES

- Flared sides help significantly reduce chance of artifacts during imaging
- Increase overall size of sponge, typically at base of product

MR SAFE POSITIONING

Select Techno-Aide products have officially been verified MR Safe products according to Testing and Labeling Medical Devices for Safety in the Magnetic Resonance (MR) Environment, Guidance for Industry and Food and Drug Administration Staff, 2023, and the American Society of Testing and Materials, International, ASTM F2503-23, Standard Practice for Marking Medical Devices and Other Items for Safety in the Magnetic Resonance Environment.
