

Experience peak panel protection with our line of **Mobile DRP Holders**

Perseverance in panel protection.

DR panels are heavy and expensive, and radiographers need to work quickly and efficiently. Simply put, this combination of weight and cost is a recipe for disaster. Panel drops are the number one cause of detector damage. The full line of **Mobile DR Panel Holders** and **Full Enclosures** provides an extra layer of panel protection. Like a cell phone case for your mobile phone, our line of protective covers provides **peace of mind** to one of the most important tools used in diagnostic imaging, the DR panel.
