*Experience Positioning Flexibility,
Superior Performance*

Positioning Flexibility and Seamless Workflow PROMO

The PROMO

PROMO enables positioning flexibility, easy maneuverability, and seamless workflow, ensuring high-quality images every time

High-Quality Imaging at Point of Care

PROMO delivers exceptional imaging services directly to the bedside, including in the ER, OR, ICU, and patient rooms. Its flexible 180-degree rotating column and maximum X-ray focal spot height facilitate easy positioning, quicker exams, and a faster workflow

Advanced Imaging Technology

Equipped with a powerful 40kW capacitor generator, dual-focal spot tube, and scatter reduction image processing features, PROMO optimizes image quality, ensuring clear and precise diagnostic images. Its on-device AI assists in the immediate detection of suspected chest abnormalities indicative of major pulmonary diseases from X-ray images

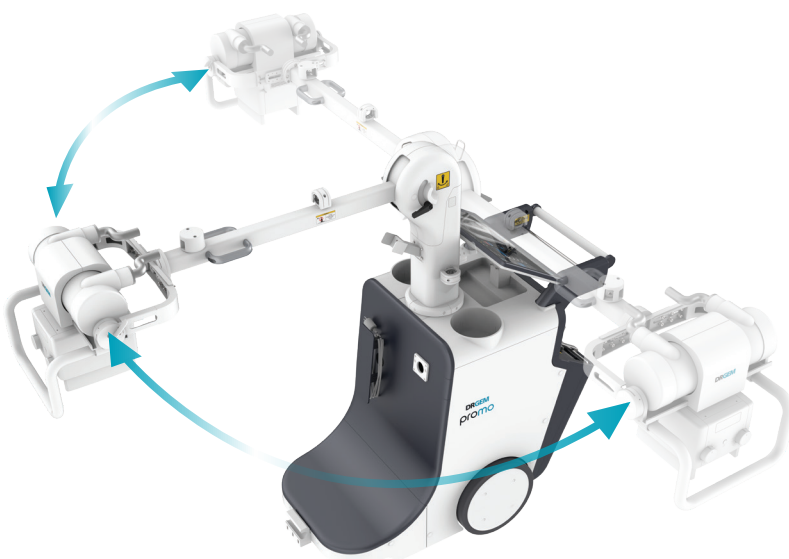

User-Friendly Interface

The push-down-and-go driving system, on-site image verification on a large 21.5-inch battery-powered touch monitor, remote control, state indicators, multi-purpose storage, built-in detector charger, and intuitive user interface allow for fast examinations and improved operability, significantly reducing training time

Digital Efficiency and Connectivity

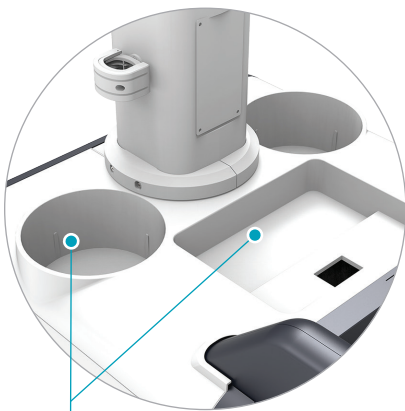

PROMO offers the speed, efficiency, and consistency of digital imaging. Operators can easily access the Hospital Information System (HIS) from any location, enabling seamless communication with the Radiology Information System (RIS) and Picture Archiving and Communication System (PACS)

Options

- Fixed Column
- DAP(Dose Area Product) Meter
- AI Assisted Diagnostic Imaging
- Scatter Reduction
- Bone Suppression

Specification

High Frequency X-ray Generator

Model	PROMO
Input Power	100 - 240 V~ (Free Voltage Input), 3kVA, 50/60 Hz
Rated Output	40 kW
mA Range	Max. 500 mA
kV Range	40 - 125 kV
